📄 Professional Summary

Senior Full-Stack AI Software Engineer with 9+ years of experience designing and building scalable web, cloud-native, and AI-powered applications. Expertise in TypeScript, Python, React, Node.js, Java, AWS, and modern AI technologies including LLMs, RAG, AI Agents, and Model Context Protocol (MCP). Passionate about delivering secure, maintainable, and high-performance software using modern engineering practices.

📁 Professional Experience

- | | |
|---|----------------------------------|
| AI Software Engineer, DXC Technology Philippines | 09/2023 – 06/2026
Philippines |
| <ul style="list-style-type: none">Designed enterprise AI applications using LLMs, RAG, AI Agents, and Model Context Protocol (MCP).Built scalable backend services and REST APIs with TypeScript, Node.js, NestJS, and PostgreSQL.Developed AI workflows for document processing, vector search, prompt orchestration, and structured outputs.Deployed cloud-native applications using AWS, Docker, Kubernetes, Terraform, and CI/CD pipelines.Collaborated with engineering, product, and design teams to deliver secure, scalable, production-ready AI solutions. | |
| Senior Software Engineer, Hootsuite (Remote) | 01/2021 – 08/2023
Canada |
| <ul style="list-style-type: none">Built enterprise web applications using React, TypeScript, Node.js, and PostgreSQL.Developed reusable frontend components and scalable REST APIs for high-traffic applications.Improved application performance through API optimization, caching, and database tuning.Contributed to Agile planning, code reviews, automated testing, and production deployments. | |
| Full-Stack Engineer, Typeform (Remote) | 02/2018 – 12/2020
Spain |
| <ul style="list-style-type: none">Developed responsive web applications using React, Node.js, Java, Spring Boot, and PostgreSQL.Built secure REST APIs with authentication and role-based authorization.Created reusable UI components and integrated third-party APIs and services.Worked closely with product managers and designers to deliver user-focused features. | |
| Junior Software Engineer, Part-time while completing Bachelor's degree | 03/2016 – 01/2018
Philippines |
| <ul style="list-style-type: none">Assisted in developing enterprise web applications using Java, JavaScript, HTML, CSS, SQL, and REST APIs.Implemented new features, fixed production issues, and maintained existing systems.Participated in testing, debugging, peer code reviews, and production support.Collaborated with senior engineers to deliver reliable enterprise software. | |

🎓 Education

Bachelor of Science in Computer Science, at De La Salle University (DLSU) 08/2014 – 06/2018

 Selected Projects

Agentic Deal Intelligence Platform (Deal Brief)

- Built an AI-powered platform that transforms sales call transcripts into structured deal briefs.
- Designed multi-agent AI workflows for information extraction, classification, compliance analysis, and recommendations.
- Integrated LLMs, RAG, vector search, and structured outputs to improve response quality.
- Delivered streaming AI responses in under **2 seconds** using efficient model orchestration.
- Built scalable backend APIs using TypeScript, Node.js, and Python.

E-commerce Platform (React Fashion Cube)

- Developed a scalable e-commerce platform using React, Redux, TypeScript, Node.js, and PostgreSQL.
- Built reusable UI components and shared frontend architecture.
- Implemented authentication, product catalog, shopping cart, and checkout functionality.
- Developed REST APIs and optimized frontend performance for a responsive user experience.

 Core Technical Skills

AI & Machine Learning

LLMs, RAG, AI Agents, MCP, Prompt Engineering, LangChain, Vector, Search Structured Outputs, Function Calling

Frontend

React, Next.js, Angular, Redux, HTML5, CSS3, Sass

Cloud & Platform

AWS, Docker, Kubernetes, Terraform, Git, GitHub Actions, CI/CD, Linux

Testing

Unit Testing, Integration Testing, API Testing

Programming Languages

TypeScript, JavaScript(+ES6), Python, Go, Java

Backend

Node.js, NestJS, Express.js, REST APIs, GraphQL, Microservices

Databases

PostgreSQL, MySQL, MongoDB, Redis

 Key Achievements

- Designed and delivered enterprise AI applications using LLMs, RAG, AI Agents, and MCP.
- Built scalable cloud-native applications using AWS, Docker, Kubernetes, and Terraform.
- Delivered low-latency AI responses through efficient workflow orchestration.
- Developed reusable frontend architectures and scalable backend services.
- Implemented automated CI/CD pipelines to improve deployment reliability.

 Languages

English

Professional Working Proficiency

Filipino (Tagalog)

Native Proficiency
